

Washington Cyber Roundtable

...cyber collaboration where it counts

Who We Are

- An industry liaison group dedicated to enhancing the vitality and security of cyberspace
- A non-profit, 501(c)(6) organization comprised of leading technology innovators, professional services firms, and systems integrators
- A vehicle for the public sector to constructively engage business executives and technical experts to address cyber challenges related to security, policy, technology, analysis, and training
- Celebrating our 10th year of operations

...cyber collaboration where it counts

What We Do

- Provide a non-attribution environment and conflict-free mechanism for the public sector to access the expertise of industry
- Moderate roundtable discussions led by government officials to discuss the discrete cyber challenges they face
- Conduct – in coordination with government partners – voluntary member-led projects that deliver solutions to those specific government challenges

How We Operate

- Non-profit entity funded by member dues
- No government funding
- No lobbying activities
- Focused, tailored, impactful projects
- Accessible across Federal, State, and local governments
- Programs shaped by member objectives and interests

Why Members Join and Participate

Members actively contribute to roundtables and reports to:

- Improve the Nation's cyber posture
 - Bring management and technical expertise to bear on major issues that impact our security and economy
- Gain insights on trends in the cyber community
 - Identify national priorities and collaborative opportunities
- Have an outsized impact
 - In an intimate and focused setting, shape solutions to challenges that cut across specific programs and corporate objectives
